### PROFESSIONAL SUMMARY

System-focused Full Stack Engineer with proven expertise in designing resilient distributed architectures, scalable RESTful microservices, and high-performance web applications. Specialist in bridging robust frontend interfaces with low-latency backend systems using React, Node.js, Express, AWS, and Docker. Deep understanding of end-to-end system design, applying practical architectural patterns such as Redis caching, database indexing, multi-AZ fault tolerance, and load balancing to optimize application throughput, data consistency, and production stability.

### SYSTEM DESIGN & TECHNICAL SKILLS

**System Architecture:** Distributed Systems, Microservices Architecture, Scalable API Design, Caching Strategies (Redis), Database Indexing & Sharding, High Availability (HA) & Fault Tolerance, Load Balancing

**Full Stack Development:** JavaScript (ES6+), Python, Node.js, Express.js, React.js, React Native, RESTful APIs, JWT, OAuth 2.0

**Cloud & Infrastructure:** AWS (EC2, S3, RDS, Lambda, ECS/Fargate, CloudFront, Route 53), Docker, Kubernetes, CI/CD Pipelines (GitHub Actions, AWS CodePipeline), CloudWatch, Grafana

**Databases & Storage:** MongoDB, PostgreSQL, MySQL, Redis (Caching / Session Management)

### PROFESSIONAL EXPERIENCE

**Gaddr** — Stockholm, Sweden — RemoteOct 2025 – March 2026

#### Full Stack / Cloud Engineer

- Designed and built scalable full-stack web applications and microservices, ensuring optimal API latency and clean architectural boundaries.
- Automated end-to-end deployment workflows via GitHub Actions, streamlining build, test, and release cycles across production environments.
- Managed cloud application deployments on Vercel and Render, enforcing strict environment isolation, secret management, and high availability.
- Integrated real-time monitoring and logging systems via CloudWatch to proactively resolve backend bottlenecks and operational incidents.

**Smart Approaches** — Sunderland, U.K. — Remote2023 – 2024

#### Software Developer

- Architected responsive, component-driven user interfaces in React.js, optimizing client-side state management and frontend execution speed.
- Designed and integrated enterprise REST APIs, ensuring efficient data fetching, payload optimization, and seamless UI synchronization.
- Participated in architectural reviews, sprint planning, and code refactoring within Agile environments using Jira and GitHub.

### SYSTEM DESIGN & TECHNICAL PROJECTS

- Multi-VPC Cloud Infrastructure:** Architected a high-availability AWS backend environment featuring multi-AZ ECS/Fargate services, RDS read-replicas, S3 asset storage, and CloudFront CDN edge caching.
- Microservices Containerization & Delivery:** Containerized multi-tier full-stack applications with multi-stage Docker builds, automating deployment rollouts via AWS CodePipeline and Kubernetes.
- Distributed Authentication Engine:** Designed a centralized identity service implementing stateless JWT tokens, bcrypt password hashing, API rate-limiting, and OAuth 2.0 authentication flows.

### EDUCATION & CERTIFICATIONS

- HND in Computer Science** — The Polytechnic Ibadan (2016)
- DevOps Industrial Training (AI, MLOps & Data Engineering)** — IBT Learning Africa (2025)
- AWS Cloud Computing Bootcamp** — CloudSec Network (2025)
- Certified Mobile App Developer** — GIIT (2023)
